

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

① 10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal Think about the problem you'll be focusing on solving in

the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

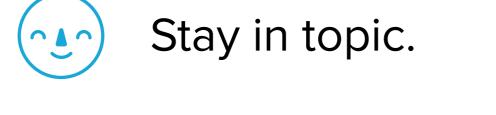

PROBLEM

How might we overcome unprecedented fire attacks which causes irreplaceable damages and sometimes causes lives of people?

Key rules of brainstorming

To run an smooth and productive session

Encourage wild ideas.

If possible, be visual.

Listen to others.

Go for volume.

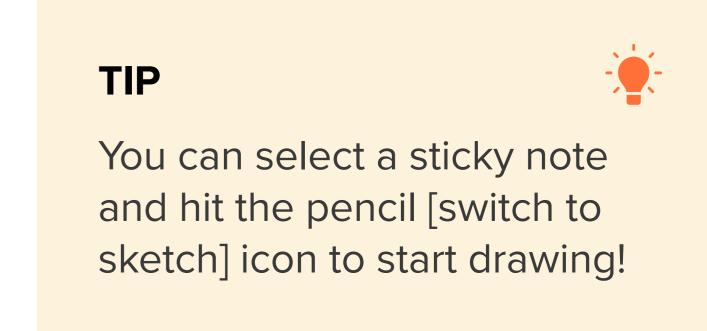

Brainstorm

Write down any ideas that come to mind that address your problem statement.

Deepak kumar			Naveen vishak			Jasith			Bharathraj			
Early detection	Robust Monitoring	Proper communication		Lorawan protocol	MQTT protocol	fire extinguisher	usage of camera for detecting fire	Alarming the end users	Smoke detection system	Usage of sprinkler	Gas Detection	Flame Detection
Usage of advanced technology	Alertness	providing safety measures		Life saver	Using several sensors for detecting the density of fire		Connecting microcontroler with cloud for the purpose of exchanging data			Notifing User with a emergency alert	Informing nearby fire station	Temperature Detection

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

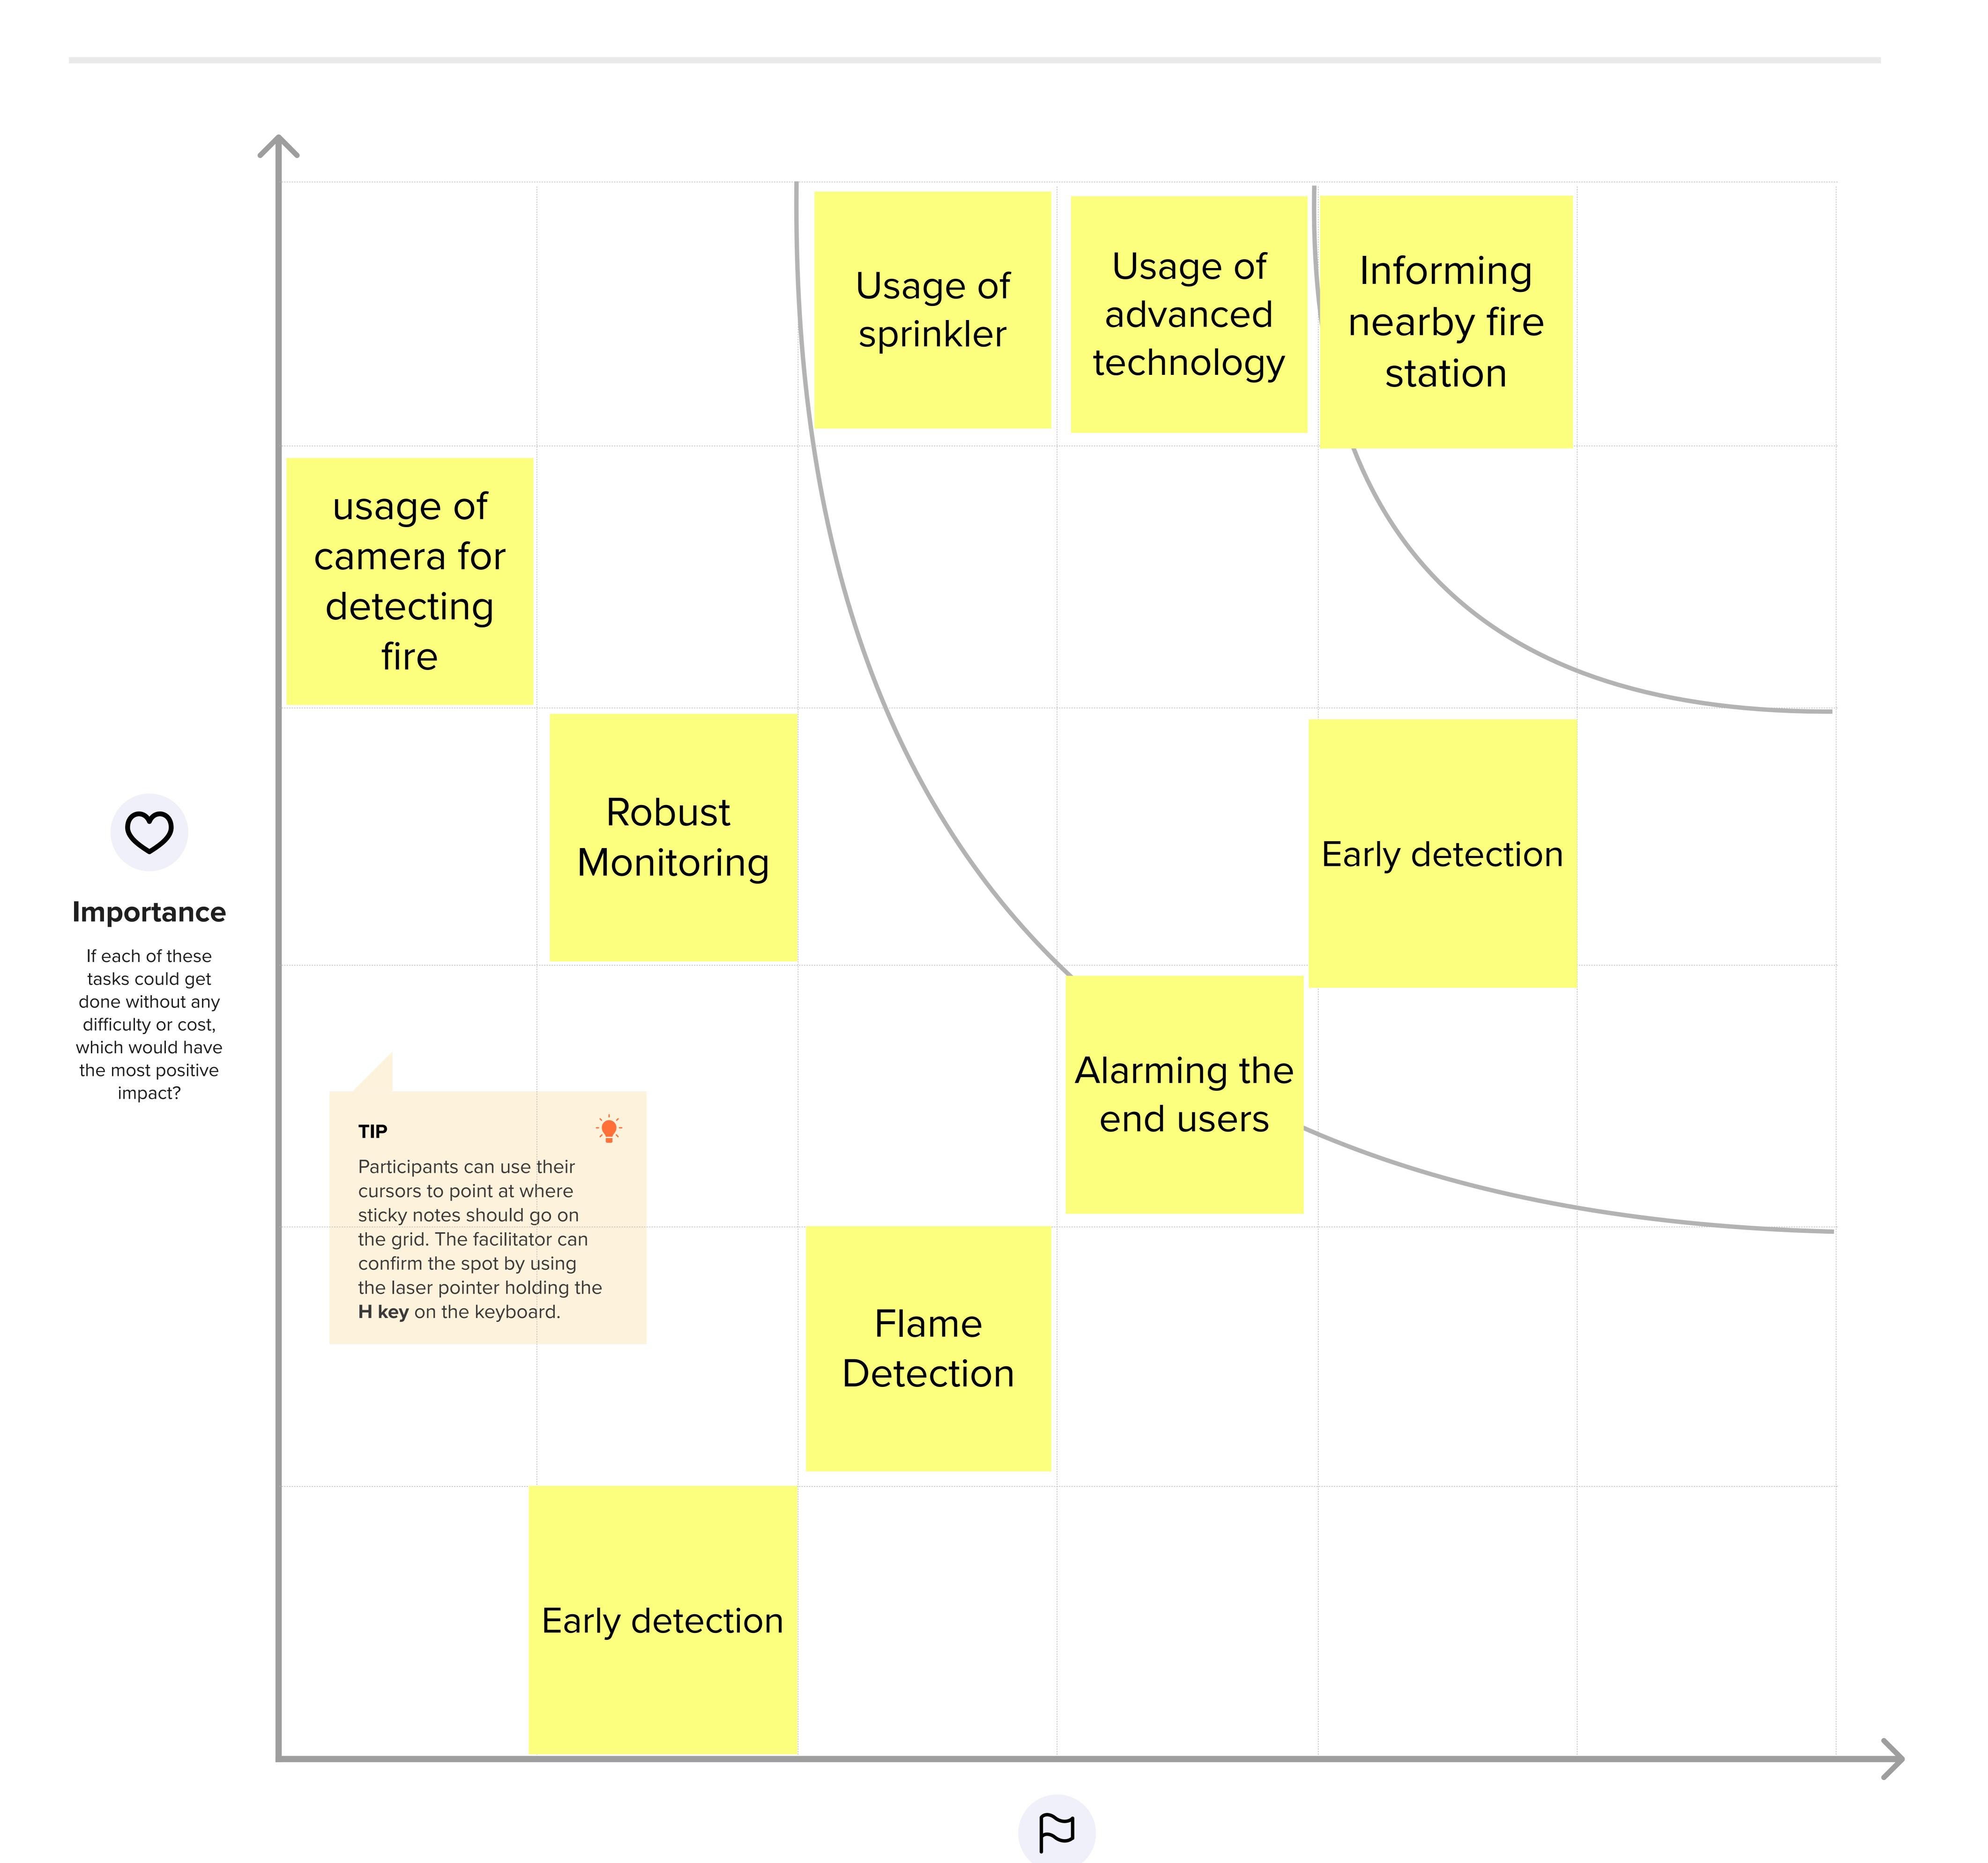

Usage of sprinkler	Gas Detection	Flame Detection	Notifing User with a emergency alert	Informing nearby fire station
usage of camera for detecting fire	Alarming the end users	Smoke detection system	Connecting microcontroler with cloud for the purpose of exchanging data	Temperature Detection
Lorawan protocol	MQTT protocol	fire extinguisher	Using several sensors for detecting the density of fire	Early detection
Robust Monitoring	Proper communication	Usage of advanced technology	Alertness	providing safety measures

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint

Define the components of a new idea or strategy.
